app
Treatments

Otto Ebenbichler recommends:

„The list of treatments can be mapped alphabetically, numerically ascending (A-Z, 1-100) or descending (Z-A, 100-1) or can be mapped individually.

To do this, click on the title and move the title while holding the left mouse button pressed . The system keeps track of any resulting order. At the next system entry it shows automatically the collection sequence favored by you."

- 📖 patient file
- ⟳ refresh platform
- ? download manual
- ✖ delete all data

date of treatment, doctor

The date of treatment can be set by mouse. Click on „date of treatment" - a calendar window opens. Leave this window with a mouse click outside. The doctor is entered as a contact import.

Diagnosis

With one mouse click on the symbol ⊕ , you create a new diagnostic aspect. You can draw graphically with ▮ and make notes on the right side. ◆ erases your graphics, ▯ deletes the selected diagnostic aspect (click on the number), ↩ allows you to go one step back.

treatment plan

Update ✖

status ⚠

Always make sure that every treatment has his correct current treatment status (in diagnosis, in treatment, completed, cancelled).

modules

This gray bar shows the modules you are allowed to work with. With one simple mouse click on a module title you switch to the desired module. The position at which you leave the module remains stored, that means by going back you will get to the same place where you have left the module.

autor information

Here you receive "log information". It is documented by whom and when the last entry dates (entry links) and by whom and when this data sheet was created (entry right).
